Cut Price, Close-Out Sale of Tulip and other Fall planted Bulbs.

Bulbs grown here on Puget Sound are recognized as being superior to those produced in any other part of the world—earlier blooming, longer lasting flowers, longer stems, larger blossoms and finer coloring. You take no chances with Puget Sound grown bulbs.

Uncle Sam has thrown down the bars to importations of foreign bulbs and this country is deluged by a flood of cheaply-grown stock from Holland. American growers cannot pay one dollar per hour for labor (when they can get it) meet this competition and make a living. We will take a loss now and quit the fall bulb end of our business—going to have to pay increased taxes to help send free food back to these people.

"Blooming size" means many things. Compare our sizes and prices with others (if you can find exact measurements in the catalogs) and you will find we really mean it when we quote cut prices. First size tulip bulbs measure one and three-eighths to one and one-half inches in diameter—they are for forcing in pots and pans, fine for garden too. Second size, one and one-fourth to one and three-eighths. Third size, one to one and one-fourth. Second and third sizes best for garden planting. Fourth size three-fourths to one inch, most of them will bloom first year and be tops second year. They are usually advertised as blooming size.

Cut price applies to following varieties:

First size, 12 for 75¢, 50—\$3.00, 100—\$5.25. Second size, 10—50¢, 50—\$2.00, 100—\$3.50. Third size, 10—35¢, 50—\$1.50, 100—\$2.50. Fourth size, 25—60¢, 100—\$2.00.
